Education

University of North Carolina at Charlotte <i>M.S. in Artificial Intelligence / Early Entry Program</i>	Charlotte, NC <i>Expected May 2028</i>
University of North Carolina at Charlotte <i>B.S. in Computer Science / Concentration: AI, Robotics, & Gaming</i>	Charlotte, NC <i>Expected May 2027</i>

Experience

Lead Instructional Assistant, ITSC 1213 <i>UNC Charlotte College of Computing and Informatics</i>	Charlotte, NC <i>August 2026 – Present</i>
• Serve as lead instructional assistant for an asynchronous Python programming course, coordinating grading, rubrics, office hours, student support, and course logistics with the instructor. • Build and debug Python autograders and test suites for programming assignments, emphasizing executable behavior, edge cases, and clear feedback for students. Review submission patterns and course analytics to identify recurring implementation errors and improve assignment guidance, testing instructions, and pre-submission checks.	
Instructional Assistant, ITSC 3160 <i>UNC Charlotte College of Computing and Informatics</i>	Charlotte, NC <i>August 2026 – Present</i>
• Support database-design students through grading, office hours, and targeted assistance with relational modeling, normalization, SQL, and semester project requirements.	

Research Intern <i>Stevens Institute of Technology, Dr. Jina Huh-Yoo</i>	Remote <i>June 2026 – Present</i>
• Engineered <i>rq-system</i>/LEAF, an AI-assisted literature-analysis pipeline using PubMed E-utilities, CrossRef, and LLM APIs to screen, classify, and extract structured evidence from 345 papers; processed 256 included, 80 excluded, and 9 review-flagged papers.	

Projects

RoomCode <i>Python, Flask, JavaScript</i>	2026 – Present
• Built a multi-session collaborative coding environment with real-time synchronization, host-controlled execution, and isolated file trees. • Deployed the platform across 20+ lab sessions with concurrent users, supporting collaborative programming and classroom workflows.	
Scout Opportunity Notifier <i>Python, Discord API, SQLite, Railway</i>	2026 – Present
• Built and deployed an opt-in internship and hackathon aggregator with automated ingestion, deduplication, persistent subscriber preferences, and restart-safe SQLite storage. • Implemented personalized daily/weekly Discord digests, category-specific subscriptions, preference controls, unsubscribe flows, paginated listings, administrative broadcasts, and scheduled delivery windows.	
Hera's Garden <i>Node.js, Express, MariaDB, Discord.js, Java, Paper API, Railway</i>	2024 – Present
• Built and maintain a persistent creative-community platform spanning a full-stack website, Discord automation, and a custom Minecraft server ecosystem with scheduled releases, rank-gated access, OAuth2 administration, moderation, and persistent progression systems. • Designed Java/Paper systems for claims, territories, governments, housing, shops, mail, events, NPC societies, and economy features while integrating identity and progression across web, Discord, and game services.	
Iris <i>Electron, Node.js, Discord.js, SQLite, sqlite-vec, Ollama, MariaDB</i>	2025 – Present
• Developed a local-first personal-memory and community-automation system combining desktop tooling, persistent memory, local language models, and Discord operations. • Built verification, moderation, private-channel, XP/ranking, and notification workflows using SQLite/sqlite-vec and Ollama-based local retrieval and model components.	
Iris Calliope <i>Python, discord.py, SQLite, Fernet, LLMs, Railway</i>	2026 – Present
• Built a privacy-conscious Discord roleplay chronicle system that summarizes approved bot-generated activity without publicly ranking or profiling users.	

Technical Skills

Languages	Python, Java, JavaScript, SQL, C++, HTML/CSS
Frameworks	Flask, Node.js, Express, Discord.js
Systems	SQLite, MariaDB, Git, Docker, Railway, REST APIs
